

UNAI MEMBER ACTIVITY REPORT 2013-2014

CCLP Worldwide

India

CCLP Worldwide has actively supported the principles of the United Nations Academic Impact initiative during the period of March 2013 through February 2014. The institution's efforts were most heavily concerned within the following UNAI priority areas: educational opportunity for all, fighting poverty through education, capacity-building in higher education systems and sustainability through education. Amongst the UNAI-relevant activities CCLP Worldwide engaged in this past year are the following:

Through its publication of "The Education Charter", an international magazine, CCLP Worldwide called attention to the potential for citizen empowerment through education.

Various seminars were organized by CCLP Worldwide to highlight the critical link between education and sustainability. Furthering this effort, the institution and its administration also published a book relaying the importance of education to a future of sustainable, global cooperation.

By way of its website and members network, CCLP Worldwide constantly upholds its vision of "Education for All". This year, it went as far as to organize a peace rally on International Peace Day to promote the restoration of global peace through education. Even more recently, CCLP Worldwide arranged an event to promote the eradication of poverty through education—a mission that was publically undertaken in the 13th and 14th editions of their international magazine, "The Education Charter".
